

Access to the server de.NBI Cloud

- Log in to your nbi-cloud account
- Under “profile” generate a new ssh-key pair (alternatively you can create one on your own via your OS)

Public Key

Tutorial: [How to generate a ssh keypair?](#)

Generate
Key

Set
Key

Copy
Key

- Send the public key to an admin of the server, he will add the key to the “authorized_keys” (nano .ssh/authorized_keys) which will allow you access to the server-terminal
- type `ssh -i /path/to/private/key ubuntu@134.176.27.91` (for macOS replace ubuntu by “centos”) in your terminal
- You have now access to the servers terminal
